

BIPOL flexible endoscope CBF-4 consists of a flexible probe PVC covered and water and oil resistant diameter 4mm and with working length of 920mm and a integrated Xenon battery handle.

The optical fiber bundle is made of 7.400 pixels which offers a very good resolution for this price range. Focusing can be manually adjusted fro 10 mm to infinity. Power is provided by 2 AA batteries.

In option, it accepts a set of 3 mirrors (70°, 90° & 120°) in order to provide different directions of vision.
